

Climate objective 1:

Managing school energy consumption

Measures/ Activities	Who?	Available Means	until?	done	Remarks
Measure insulation and heat leakage of the school building.	School project work group	Chemistry institution funds for instrument.	March 2013		The school could for instance get an IR-thermometer to do an inventory of where heat is. leaking out of the school.
Calculate energy consumption on 1 to 1 computers	School project work group	No funds needed.	March 2013		
Find a way to turn off the computers at night centrally in computer classrooms	School project work group	School funds	March 2013		

Climate objective 2:

Managing school water consumption.....

Measures/ Activities	Who?	Available Means	until?	done	Remarks
Reduce water used when using toilets	School project work group	School funds	March 2013		By placing a brick or similar in a toilet will reduce the amount of water used when flushing.
Calculate water consumption	School project work group	School funds	March 2013		

Climate objective 3:

Increase awareness about the climate effect of our school lunch system

Measures/ Activities	Who?	Available Means	until?	done	Remarks
Inventory of climate effects of lunches in different restaurants	School project work group	No needed	?		Life-cycle analysis etc. No such group formed yet. Maybe Grönt Är Skönt can do it?
Raise awareness about climate friendly (or un-friendly) options	School project work group	No needed	?		No such group formed yet. Maybe Grönt Är Skönt can do it?

Climate objective 4:

Managing school waste management

Measures/ Activities	Who?	Available Means	until?	done	Remarks
Creating an efficient waste management system for recycling .	School student environmental group "Grönt Är skönt"	School funds	2012-may 2013		
Information – On how to recycle etc.	School student environmental group "Grönt Är skönt"	School funds	2012-may 2013		In the inventory of the schools waste, all plastics, hard and soft, were included and assumed to have similar climate effects. Is this really the way it should be? What does the climes model say?

Climate objective 5:

Addressing school environmental policy and management

Measures/ Activities	Who?	Available Means	until?	done	Remarks
Finding a way to keep CLIMES "alive" and to work actively with the CLIMES management system.	Students and school personal	School funds			
Working on environmental policy document	School student environmental group "Grönt Är skönt"	No funds needed.	This work is supposed to be continuous.		<ul style="list-style-type: none"> - Including goals and tasks in the policy. - Assigning responsibility's- Make sure this is done by the school leaders since it seems very unclear now what can be done by the school and who is responsible for what.
